American Legion Discount Prescription Drug Program

Welcome to The American Legion Prescription Discount Program! This program is not insurance. It is simply a convenient, easy to use program to save on prescription medicine when it is not covered by insurance. To learn more, visit <http://www.caremark.com/legion>

Easy

Simply present your American Legion Prescription Discount card along with your prescription(s) at a participating pharmacy. The program offers an average savings of 20 percent off the regular retail price. Finding a participating pharmacy is easy – nine out of 10 pharmacies nationwide participate in the program, including all major chains and many independent pharmacies.

No Limits

You and your family may use your discount card any time your prescription is not covered by insurance. There are no restrictions and no limits on how many times you may use your card.

Extra Savings

When you use your new prescription discount card, you will automatically receive a Health Advocate Card in the mail. Your special Health Advocate Card offers you a 20 percent savings off CVS branded products in all CVS/pharmacy® stores nationwide. You will receive this card in the mail approximately two to three weeks after you begin using your prescription discount card. Once you receive your Health Advocate Card, simply present it at the time of purchase to receive this discount.

Eyewear

Save approximately 40%!

Eye health is important, especially as we age. Regular eye exams not only identify vision correction needs, but may detect eye conditions such as glaucoma and cataracts and many health conditions including high blood pressure and diabetes in their early, most treatable stages. That's why we are making it vision care affordable for you through EyeMed Vision Care. Follow these simple steps:

1. Locate a participating provider - Choose from LensCrafters, Pearle Vision, Sears Optical, Target Optical and many private practice locations.
2. Show your American Legion or SAL card.
3. Save approximately 40% on eyewear as often as you like.

To find a provider call 1-800-793-8626 or visit www.eyemedvisioncare.com and click on "Members" then "Login/Register" and then scroll down and select the letter "A" to find The American Legion discount plan.

Life Line Screening

The American Legion and **Life Line Screening**, the nation's leading provider of community-based preventive health screenings, believe in the power of prevention. That's why we've partnered together to offer our members these screenings at a discount not available to the public.

In less than an hour, you can be screened with painless, non-invasive, advanced ultrasound technology for stroke and other disease prevention in the convenience and comfort of your own community.

The screenings are performed by highly qualified and skilled technologists and reviewed by a board-certified physician. You'll receive a confidential written report within 21 days and are encouraged to share the results with your doctor.

Prevention is empowering, and may even be life-saving. To help you take control of your health, Life Line Screening offers the following screenings:

- 1. Stroke / Carotid Artery Screening:** Strokes are most commonly related to plaque build-up in the carotid artery. This ultrasound test is performed by applying gel and a transducer along your neck to view the carotid arteries for blockage.
- 2. Atrial Fibrillation:** A ECG device is used to determine whether or not you have Atrial Fibrillation (AFIB), or an irregular heartbeat. Adults over 40 have a 1 in 4 chance of developing AFIB in their lifetime. A diagnosis of AFIB means that your risk for stroke increases five-fold.
- 3. Abdominal Aortic Aneurysm (AAA) Screening:** An abdominal aortic aneurysm is a "ballooning" of the wall in the abdominal aorta. The majority of people with AAAs have no symptoms. If an AAA ruptures, the mortality rate is 80-90 percent. More than 15,000 U.S. residents per year die of AAAs. The good news is that AAAs can be identified via an ultrasound screening.
- 4. Peripheral Arterial Disease (PAD) Screening:** Eight to twelve million Americans suffer from PAD. It is 4-5 times more likely that you will die from heart disease if you have PAD. Ultrasound technology is used to screen for PAD (plaque buildup in the arms and legs).
